

What To Expect – System Requirements

Audience:

All Express 222™ users.

System Requirements for using Express 222: (only 2 items)

- 1 PC running a recent version of Windows and Internet Explorer 7.0 or higher, in which your DEA-issued digital signing certificate is stored.
- 2 Express222™ automatically prompts the Digital Signature Plug-in to be configured in Internet Explorer if it is not already available.

If you are running an older version of Internet Explorer, you can download the latest version (free) from the Microsoft Web site: <http://www.microsoft.com/windows/internet-explorer/worldwide-sites.aspx>

Note: If your PC was purchased before 2005, then there is a remote possibility that whatever version of Windows you are running might need an update as well. If it does, then the first step of the Digital Signature Plug-in process will direct you to the Microsoft Web site for the required update.
